

Foundation Info

CONTENTS

About projects supported by Foundation:

- Tara sets off on the Tara Pacific expedition
- 40 children are being supported by the Ouallam Association of Children and Young Workers (Niger)
- 69 Cambodian families interviewed by Family First

Last projects supported:

HUMANITARIAN EMERGENCIES & DEVELOPMENT AID

- Harmonie Mekong: Creating a waste management service and conducting a feasibility study for a drinking water conveyance system
- Novam Spemus: Creating an educational workshop equipped with electric sewing machines operating on solar energy
- MSF: A research and innovation partnership with the NGO Médecins Sans Frontières (MSF – Doctors Without Borders)
- REFELA-CAM:

Humanitarian & Development

Earthquake in Ecuador: the Veolia Foundation is rallying round to supply water to the disaster victims

The 16 April earthquake in Ecuador claimed hundreds of victims. French volunteers from the Veolia Foundation and their Ecuadorian colleagues are working on the ground to supply the disaster-stricken communities with drinking water.

The Lubumbashi Declaration: a key phase in the fight against cholera

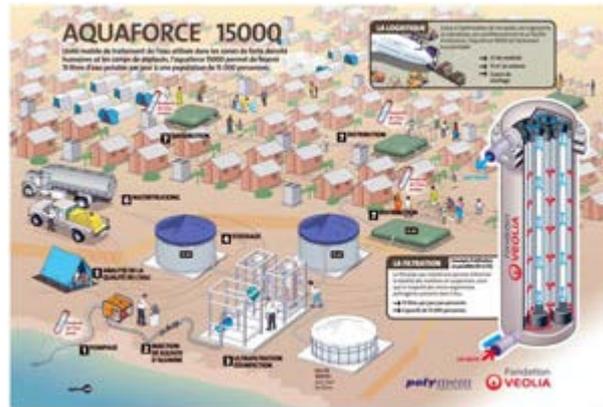

In Lubumbashi in the Democratic Republic of Congo (DRC), ministers from eight of the country's provinces have pledged to locally roll out the

Renewable energy electrification project in Cameroon

SOCIAL INCLUSION THROUGH WORK & SOCIAL LINKS

- Acta Vista: Setting up back-to-work projects to rehabilitate built heritage
- AGOIE: Developing green building expertise on an inclusion scheme to enhance the skills of young people seeking to re-enter the working world
- Bergerie de Berdine: Construction and improvement of facilities for vulnerable people
- Life Project 4 Youth (LP4Y): Creating a micro-entrepreneurship learning centre in Kolkata
- Ligue varoise de prévention (LVP): Setting up a shared garden to foster social cohesion within a residential estate in Toulon
- Lille Sud Insertion: Rollout of eco-friendly practices in back-to-work schemes specializing in green spaces in South Lille. Economic development of the business.
- Lulu dans ma rue: Creating and running an inclusive neighbourhood concierge service.
- PL4Y International: Convey to children the values of sport, citizenship and respect for the environment.
- Une oasis dans la ville: Organization and moderation of shared activities in Seine-Saint-Denis
- VoisinMalin: Structure the VoisinMalin network's

national cholera control programme. This is an innovative move and the Veolia Foundation is very much a part of this collective mobilisation against a waterborne disease which still claims many victims.

The Veolia Foundation presents the Aquaforce 15000 during DIHAD in Dubai

From 21 to 23 March, the Foundation is at DIHAD, the international humanitarian exhibition. At the invitation of the French government, it is presenting the Aquaforce 15000 – a major new innovation providing access to water during humanitarian emergencies.

Social & Employment

PL4Y International signs a framework agreement with the French Ministry of Education

PL4Y International, supported by the Veolia Foundation since 2012, has just had its work endorsed by the French Ministry of Education. Its Playdagogy method, which uses sport to involve schoolchildren, is going to be rolled out in the REP and REP+ Priority Education Networks. The method is an effective way of fostering green behaviour in children from a very young age.

Environment & Biodiversity

Over 7,400 learners followed the MOOC on the Causes and Challenges of Climate Change

management body. VoisinMalin is a social enterprise which fosters and maintains social ties in working-class areas.

ENVIRONMENTAL & BIODIVERSITY

- Etablissement public de La Villette: extension and lay-out of an educational, social eco-garden within the Parc de la Villette, open to the general public and people with disabilities
- Fondation UVED: Creating MOOCs about Biodiversity and the Causes and Challenges of Climate Change
- Kasciopé: Organization of two mobile exhibitions and forums dedicated to environmental issues and green economy businesses
- Parc Naturel Régional de Camargue (PNRC): Organize the protection of flamingos and fish species in the Camargue; extend the project with an international cooperation programme

Over 7,400 learners followed a MOOC (massive open online course) about the Causes and Challenges of Climate Change over a six-week period this winter. Delivery and content quality met with the unanimous approval of the 'students' of this course created with the support of the Veolia Foundation. And the good news is that the course content is still available online!

PUBLICATIONS

Made available to the public on April 21, **the Foundation's annual report 2015** is freely available in both a digital and a paper version. It can be accessed on the Foundation's new website, as a showcase for the activities that have been performed for the past twelve years.
