

## IN BRIEF

- Malaria control: the initial feedback from a study in Burkina Faso
- Exploratory mission of three Veoliaforce volunteers in Manila
- Tara in Sydney Harbor
- Energie Jeunes advertised on bus stops
- A new first aid training centre in Burkina Faso
- Veolia Belgium employees lend a hand at Les Garances
- Distinguished Foundation Trustee for Cholera Control
- Record numbers register for Uved's environmental engineering Mooc
- "The circular economy - creating social and environmental value"

## Humanitarian & Development

### Hurricane Irma: a story of exceptional mobilization

The production and distribution of water is gradually returning to normal in Saint Martin, French West Indies, following Hurricane Irma. The Veolia Foundation's expertise in emergency situations and the mobilization of its Veoliaforce volunteers accompanied the work of Veolia employees to help the population regain access to water.

## Social & Employment

### Already 13,000 services provided thanks to Le Carillon

Supported by the Veolia Foundation, the Le Carillon solidarity network is an exponential success: more than 600 retailers have already provided some 13,000 services to homeless people. The association is building on this success to launch 'waiting products' to allow everyone to become involved in local solidarity.

---

## Environment & Biodiversity

---

### First assessment at the halfway point of the Tara Pacific mission supported by the Veolia Foundation

Having left from Lorient in France in May 2016, the schooner Tara made an initial assessment at the mid-point of the expedition to evaluate the impact of climate change on the coral reefs in the Pacific Ocean. The Tara Expeditions Foundation, of which the Veolia Foundation is a long-time partner, is also supported by CNRS, CEA, CSM, Université Paris Sciences & Lettres, and many public and private partners.
